

## Attachment 7: Minor Corrections to the California Carpet Stewardship Plan v3.0

1. **Page 5:** To be consistent with Figure 1(Plan v3.0, page 16) the sentence below should be edited as noted: ~~strikeout~~ (text to delete) and underlined (text to insert).

“For example in 2012, there were 112M pounds of old carpet ~~diverted from landfills~~ collected which represents approximately 31.% ~~initial diversion~~ of the discarded carpet, an outstanding result at this early stage of program implementation. Additionally, about 32% of the 112M pounds ~~diverted~~ of carpet collected were converted into recycled output.”

2. **Page 22:** The following sentence should be revised as noted to be consistent with Figure 1 (page 16):

“It is worthy of note that as of 3Q 2013, Type 1 outlets currently represent 99% of all collected PCC material converted to recycling output, equivalent to an 11.51% recycled output level despite the loss of two key recyclers in the 2<sup>nd</sup> and 3<sup>rd</sup> quarters.”

3. **Page 51, Attachment III, Definitions Used in the Plan**

Definitions are now posted on-line at this web link:

[www.carpetrecovery.org/pdf/AB2398/DefinitionsUsedInTheAB2398Plan.pdf](http://www.carpetrecovery.org/pdf/AB2398/DefinitionsUsedInTheAB2398Plan.pdf)

These terms appear in Attachment III:

“**Collected:** Gross pounds of CA PCC collected (total includes material that may eventually be sent to landfill).”

“**Recovered:** Gross pounds of CA PCC collected (this includes unrecyclable PCC carpet or carpet processing waste that may eventually be sent to landfill).”

“**Gross Collected:** Actual pounds of PCC removed from waste stream for reuse, recycle, CAAF, Kiln or WtE, as reported to CARE by recyclers, prior to processing.”

“Collected” and “recovered” and “gross collected” have essentially the same definition--all terms include carpet that is collected and some of these materials may eventually be landfilled. CalRecycle would request that CARE utilizes one definition for “Collected” “Recovered” and “Gross Collected” to minimize confusion. CARE and CalRecycle should continue to refine definitions.

4. **Page 67:** Davis Street Transfer Station no longer accepts postconsumer carpets.
